

FYP Proposal Submission Form

Important:

> Please follow words limit of each section, otherwise the form will not be submitted.

*** Project Title:**

(7 words left)

Vendra: A Multi-Vendor Digital Marketplace for Global Commerce

*** Which real world problem shall be solved by this FYP?**

(21 words left)

scalable marketplace that integrates a vendor POS with dual inventory (private actual stock and public visible stock), escrow-based payments to reduce fraud and disputes, and a policy-driven order lifecycle for customers, vendors, and riders. The solution improves stock accuracy, increases trust, reduces cancellations, and enables a sustainable business model with fair rider payments.

*** Is it an industrial project?**

☒ No ☐ Yes

Detail of Project Members:

1: CIIT/SP23-BCS-045/WAH MUHAMMAD BILAL

2: CIIT/SP23-BCS-088/WAH ZOHAIB KHAN

Supervised By:

Dr. Muhammad Sharif

*** Project Description:**

Note: Login/logout and authentication/authorization shall be the default functionalities of Web/Gaming/Mobile/Desktop FYPs.

(a) What is the overall working/summary of this FYP? (125 words left)

delivered), and earn through a payout formula based on base fee, distance, and waiting time rules. The admin module approves vendors/riders, manages categories, defines policy rules (cancellations, refunds, penalties, visibility limits), and monitors platform operations. The platform earns through configurable commission and service fees, and can later extend to subscriptions and promotions. This solution targets improved inventory accuracy, reduced order failures, stronger trust, and scalable deployment for Pakistan with potential international expansion.

(b) Write name and detail of each module in your FYP. (363 words left)

- Policy & Dispute Module: Rules for cancellations, penalties, refund decisions, evidence (photos/timestamps), dispute resolution.
- Admin/Organization Module: Vendor/rider approvals, policy configuration, commission/service fee settings, analytics dashboard.
- Notifications Module: Email/SMS/in-app alerts for order and delivery updates.

(c) Member-wise Module Information

1: Which module shall be developed by MUHAMMAD BILAL (CIIT/SP23-BCS-045/WAH) ?

(Min limit: 25 words) (100 words left)

Will develop the Vendor, POS and Inventory Management Module. This includes vendor onboarding, product and pricing management, stock in/out with stock ledger, walk-in POS sales, online order reservation and packing workflow, and private-to-public inventory visibility rules. Member 1 will also implement admin controls related to vendor approval and

2: Which module shall be developed by ZOHAIB KHAN (CIIT/SP23-BCS-088/WAH)?

(Min limit: 25 words) (95 words left)

includes customer browsing and checkout, order lifecycle management, escrow hold/release/refund flow, rider onboarding and delivery tracking, rider payout calculation and earnings dashboard, and dispute handling with evidence and policy-based decisions. Member 2 will also implement admin workflows for rider approval and dispute resolution.

(d) Were similar FYPs already developed on the same topic in your department?

☐ Yes ☒ No

Project Detail

Choose Domain:

- ☐ Artificial Intelligence
 ☐ Cybersecurity
 ☐ Networking
 ☐ Data Science
 ☒ Cloud Computing

☐ Computer Vision
 ☐ Human Computer Interaction (HCI)
 ☐ Bioinformatics

Choose Stream:

- ☒ Web Application
 ☐ Mobile Application
 ☐ Hardware-Based
 ☐ Desktop Application

☐ Gaming Application

Choose Tools:

- ☒ Node.js (Backend JavaScript Framework)
 ☐ Angular.js (Frontend JavaScript Framework)

☒ JSON (JavaScript Object Notation, File and Data Interchange Format)
 ☒ React.js (Frontend JavaScript Framework)

☐ Rubi On Rails (JavaScript, Ruby Framework)
 ☐ Laravel (PHP Framework)
 ☐ Symfony (PHP Framework)

☐ CodeIgniter (PHP Framework)
 ☐ CakePHP (PHP Framework)
 ☐ Laminas (PHP Framework)

☐ Spring (Java Framework)
 ☐ Apache Struts (Java Framework)
 ☐ Dropwizard (Java Framework)

☐ JavaServer Faces (Java Framework)
 ☐ Grails (Java and Groovy Framework)

☐ Django (Python Based Web Framework)
 ☐ Flask (Python Based Micro Web Framework)

☐ FastAPI (Python Framework)
 ☐ Pyramid (Python Web Framework)
 ☐ Tornado (Python Framework)

☐ CherryPy (Python Framework)
 ☐ Bottle (Python micro-web Framework)
 ☐ web2py (Python Framework)

☐ Scrapy (Python web-crawling Framework)
 ☐ Dash (Python Framework)

☐ Adaptive Communication Environment (C++ Object Oriented Framework)
 ☐ Boost (C++ Libraries)

☐ SFML (Simple Fast Multimedia Library, C++ Library)
 ☐ Cinder (C++ Library)
 ☐ wxWidgets (C++ Library)

☐ CMake (C++, C Library)
 ☐ Armadillo (C++ Library)
 ☐ ASP.Net (C# Framework)

☐ Xamarin (C#, .NET Framework)
 ☐ PHP Storm (PHP IDE)
 ☐ Eclipse PHP (PHP IDE)
 ☐ Zend Studio (PHP IDE)

☐ Codelobster (PHP IDE)
 ☐ Eclipse Java (Java IDE)
 ☐ Oracle JDeveloper (Java IDE)
 ☐ JCreator (Java IDE)

☐ Pycharm (Python IDE)
 ☐ Spyder (Python IDE)
 ☐ IDLE (Python IDE)
 ☐ PyDev (Python IDE)

☐ Eric (Python IDE)
 ☐ CLion (C++, C IDE)
 ☐ Dev-C++ (C++, C IDE)
 ☒ Visual Studio Code (IDE)

☐ Anjuta (IDE)
 ☐ NetBeans (IDE)
 ☐ Eclipse (IDE)
 ☐ Xcode (IDE)
 ☐ Qt Creator (IDE)

☐ Jupyter Notebook (IDE)
 ☐ Code::Blocks (IDE)
 ☐ BlueJ (IDE)

☐ Unity 3D (C#, C++ based Game Development Engine)
 ☐ Unreal Engine (C#, C++ based Game Engine)

☐ Godot (C#, C++ based Game Engine)
 ☐ GameMaker (Game Engine)
 ☐ BuildBox (Game Engine)

☐ Phaser (Game Engine)
 ☐ Armory (Game Engine)
 ☐ CRYENGINE (Game Engine)

☐ Flutter (Software Development Kit)
 ☐ ARKit (Augmented Reality Development)

☐ WordPress (PHP based Web Content Management System)
 ☐ Photoshop (Editor)

☐ Proteus Design Suite (Design and Circuit Simulator)
 ☐ MATLAB® (Programming Platform)

☐ IntelliJ Idea (Java, Kotlin IDE)
 ☐ Android Studio (Java, Kotlin)

☐ Windows Presentation Foundation (.Net Subsystem)

Choose DBMS:

- ☐ SQL Server
 ☒ MySQL
 ☐ SQLite
 ☐ Firebase
 ☐ Oracle
 ☐ Teradata
 ☐ MongoDB

Choose Platforms:

- ☒ Linux
 ☒ Windows
 ☐ MacOS

Choose Hardwares:

- ☐ Arduino UNO
 ☐ Arduino Mega/Mini
 ☐ RFID TAGS
 ☐ MRFID Reader

☐ Internal Measurement Unit (IMU)
 ☐ Radar Detector
 ☐ Raspberry Pi
 ☐ VR HMD
 ☐ RTC Module

☐ SD CARD Module

(Week 14 - 16)

2. Implementation of ONE major use case ($\geq 30\%$ FYP work), which does not include login/logout.
3. Interface with complete functionality of major use case / In case of hardware, provide configuration of major use case functionality.

Evaluation Criteria for Internal 8th

Viva:

(Week 12 & 13)

1. Implementation of all use cases ($\geq 90\%$ FYP work)
2. Project in running and working form as per Use case, Class and Sequence diagrams as mentioned in SRDS
3. Initial FYP report
4. Deployment
 - Web: Your website must be online on any free/paid hosting service
 - Mobile App: Your app must be in APK/iOS form so that it can be installed
 - Gaming: Your game must be in executable form so that it can be installed
 - Desktop Application: Your application must be in executable form so that it can be installed
 - Hardware: Your final product must be in proper casing and should give look and feel of sellable item
